Sergio Damas received the MSc and PhD in Computer Science from the University of Granada (Spain) where he was Assistant Professor 1995-2006. He was granted with a temporal leave to start working as Deputy Principal Researcher at the European Centre for Soft Computing (ECSC) in 2006. In 2011, he was promoted to Principal Researcher of the "Fuzzy-Evolutionary Applications" research unit at the ECSC. He led the research unit at the ECSC until 2016. In 2017, he was back to the University of Granada where he is currently Full Professor.

Dr. Damas research interests are focused on two main lines related to the application of Soft Computing to support the decision maker in complex and very different environments. The first one includes the design of different kinds of economic models for strategic branding using **agent-based modeling to recreate competitive markets** for modeling and predicting sales, touchpoints, perceptions, awareness, and word-of-mouth. The second research line is focused on **forensic ID of skeletal remains** using both Soft Computing and Computer Vision.

He has published +100 peer-reviewed scientific publications, including **45 SCI-JCR-indexed journal papers (28 Q1)**. His **h-index is 22 and 27** (Web of Science and Google Scholar, respectively). He has published in prestigious journals as IEEE Transactions on Evolutionary Computation, IEEE Transact. on Fuzzy Systems, IEEE Transactions on Information Forensics and Security, and ACM Comput Surveys. He has edited two special issues on "Computational Intelligence in Computer Vision and Image Processing" in two SCI-JCR journals: Intl. Journal of Approximate Reasoning and Computational Intelligence Magazine.

He has supervised **seven PhD dissertations (three of them in the last 5 years)**; one of them received the “**Best PhD Thesis Award**” by the European Society for Fuzzy Logic and Technology (**EUSFLAT**). He owns an international patent on an intelligent system for forensic identification using Soft Computing. The corresponding software (named Face2Skull) is currently commercialized in México and received the “**Outstanding applications of fuzzy technology**” award by the International Fuzzy Systems Association (**IFSA**).

He was the general chair of the 2014 International Conference on Craniofacial Superimposition, the leading event in the field. He is the President of the Organizing Committee of the 2018 Spanish Conference on AI (CAEPIA-2018). He has also organized different international workshops, special sessions and tutorials at CEC, SSCI, WCCI and other national and international events.

He has participated in **more than 30 research projects and contracts** in European, National, and Regional calls. At a **European** level, he has been **global coordinator** (MEPROCS, 1M€), **Principal Investigator** (I-PAN, 4M€) and a project participant (MIBISOC, ENGINE).

Dr. Damas was the founder and chair for 7 years (2011-2018) of the IEEE Task Force on “Evolutionary Computer Vision and Image Processing (ECVIP)”. He was also member of the “IEEE-CIS Evolutionary Computation Technical Committee” for 7 years. He is a Senior Member of IEEE CIS. He is member of the “Soft Computing in Image Processing” (SCIP) WG

He has been an **external evaluator of different research panels** for the Spanish Agencies (ANEPE and “Comision Científico Técnica Tecnologías Informáticas TIN” – AEI) and “Science Foundation Ireland”.
